

## MD MEDICAL GROUP INCREASES OUT-PATIENT CAPACITY IN ODINTSOVO, MOSCOW REGION

**26 February 2025** – MD Medical Group IPJSC ("MD Medical", "Group" or the "Company"; MOEX: MDMG), a leading Russian private healthcare provider, announces the opening of the Lapino Odintsovo multifunctional clinic, a branch of the Lapino clinical hospital.

Launched in 2016, the out-patient clinic in Odintsovo has now moved to a new, spacious three-storey building covering an area of 1,094 sq m. This expansion has increased the clinic's capacity from 30,000 to 120,000 visits per year.

The clinic offers a wide range of medical service lines and specialities for the diagnostics, treatment, and prevention of health issues for all family members. Doctors in more than 30 fields are available, including general practitioners, paediatricians, adult and paediatric cardiologists, endocrinologists, neurologists, ENT specialists, surgeons, orthopaedic traumatologists, gastroenterologists, ophthalmologists, allergists and immunologists, ultrasound practitioners, psychologists, and speech therapists. The clinic features adult and children's out-patient clinics, as well as a women's health centre.

In the **children's out-patient clinic**, all avenues for the diagnostics and treatment of various diseases affecting young patients are available. Comprehensive health screenings, vaccinations, and diverse diagnostic procedures – from CT scans and ultrasounds to laboratory tests – are conducted. Physiotherapy and rehabilitation services are also provided to address conditions ranging from acute respiratory viral infections to recovery following trauma and surgical procedures.

The **adult out-patient clinic** offers comprehensive diagnostics and treatment for diseases at the out-patient stage. It also provides day hospital care, preoperative examinations, and comprehensive CHECK-UP programmes to assess health status. These programmes can be tailored to accommodate a patient's medical history, hereditary factors, and personal preferences, regardless of age. Rehabilitation services, including physiotherapy, massage, and kinesiology taping, are also available.

A key focus of the **women's health centre** is pregnancy planning and prenatal care, offering future mothers a full suite of necessary diagnostic services. Many doctors at the women's health centre also facilitate deliveries at the Lapino clinical hospital, ensuring pregnant women can continue their care with a doctor they trust. The women's health centre additionally addresses infertility and pregnancy loss.

The Lapino Odintsovo multifunctional clinic operates in leased premises, with a total investment of RUB 202.5 million to cover its opening and equipment. This investment was financed from the Company's equity.

### **MD Medical CEO Mark Kurtser said:**

*"MD Medical Group has long provided high-quality medical care to patients from the Odintsovsky District, primarily through our flagship, the Lapino clinical hospital. Today, we are opening a new spacious branch of the hospital in the centre of Odintsovo, specifically for the residents of this district. It will offer out-patient medical services at the quality level synonymous with Lapino but at a more affordable price tag.*

*We will continue expanding our existing out-patient centres, thus bolstering patient flow in these sought-after clinics. This year, three more of the Company's clinics will find a new home."*
